

Aroma-Lite™ Wick

Constructed of 100% natural fibers, the Aroma-Lite™ wick is designed explicitly for candles with high scent throws. By design, this cored wick is self-trimming and inhibits mushroom capping, often found in candles with high-levels of fragrance.

Features:

- ❖ Constructed from 100% natural fibers.
- ❖ Designed to be used in containers and pillars.
- ❖ Engineered to reduce and/or inhibit carbon heading and burn in candles with high levels of fragrance.

Disclaimer

The rate charts provided in this document are meant to serve only as a guide for our customers to assist them in wick selection. Many variables exist in candle wax types, additives and formulations for individual candle systems. Final wick selection should always be confirmed through the customer's own testing process to determine if a particular wick is the correct choice for a particular candle system. Wicks Unlimited is not responsible for selections made by the customer using any of the reference material contained in this catalog. For optimal burn performance in specific candle systems, we strongly recommend that customers conduct exhaustive burn tests in their own burn lab and consider retaining samples for their future internal reference. The importance of candle testing and data validation cannot be overstated.
