

Wicks Unlimited your Global Leader
For All of Your Candle Combustion Needs

Safety Neck Candle Sustainers

Wicks Unlimited manufactures and supplies safety neck candle sustainers with increased neck height enabling candle manufacturers to create tabbed wicks from waxed wick on reels. The safety neck sustainer line includes neck heights of 10.00 mm, 13.0 mm, 13.2 mm, or 14.5 mm, with base diameter(s) of 14.5 mm, 15.0 mm, or 20.0 mm. Since safety neck sustainers feature an extended neck height, the candle's flame is snuffed earlier during the combustion process. This unique feature reduces the chance of the candle's container getting hot, especially near its end of life.

Manufacturers can select two crimping options for safety neck candle sustainers: puncture and non-puncture. Wicks Unlimited's best-selling metal candle sustainers with puncture crimping enable manufacturers to develop candles that consume all the fuel (wax) at the end of life. Alternatively,

sustainers with non-puncture crimping will extinguish the flame as soon as it reaches the top of the neck and leaves unconsumed wax at the end of life. All of Wicks Unlimited's safety neck candle sustainers are manufactured from the highest quality .010" (0.254 mm) thick tin-coated steel that helps inhibit corrosion caused by fragrance and essential oils and are preferred by candle manufacturers worldwide.

Features:

- U.S.-based manufacturer & supplier of metal candle sustainers.
- Select from nine (9) safety neck sustainers with neck heights of 10.00 mm, 13.0 mm, 13.2 mm, and 14.5 mm to create tabbed wicks from waxed wick on reels.
- Base diameters for safety neck sustainers include 14.5 mm, 15.0 mm, or 20.0 mm.
- Safety neck sustainers are available with either puncture or non-puncture crimping.
- Wicks Unlimited's best-selling metal sustainers with puncture crimping enable manufacturers to develop candles that consume all the fuel (wax) at the end of life.
- Sustainers with non-puncture crimping will extinguish the flame as soon as it reaches the top of the neck and leaves unconsumed fuel (wax) at the end of life.
- Patented crimping tool exerts more pressure on the wick core without shearing the fibers, ensuring a solid crimp every time and preventing the wick from pulling out.
- The crimp will meet or exceed all standard operating requirements for crimp hold.
- Manufactured from the highest quality .010" (0.254 mm) thick tin-coated steel to inhibit corrosion caused by fragrance and essential oils.
- Wicks Unlimited's sustainers are accredited by the Quality Association for Candles and adhere to strict quality standards thanks to ISO: 9001:2015 certified quality management systems and state-of-the-art equipment.

Safety Neck Sustainers

Sustainer	Base Diameter	Overall Height	Hole Diameter
A3798	15.0 mm .590"	10.0 mm .394"	2.4 mm .094"
A3777	15.0 mm .590"	10.0 mm .394"	3.0 mm .118"
