

Infinity Bond Easymelt Hot Melt Glue Machine

The Infinity Bond EasyMelt glue machine for candle making enables operators to scale production cost-effectively with this easy-to-operate machine. This benchtop machine ships with everything needed to get started immediately, including a bulk tank, foot pedal, nozzles, built-in shot timer, easy-to-use integrated temperature control switch, and more. The Infinity Bond EasyMelt glue machine has two main systems, the electrical control system and the heating system, including a hydraulic system and a pneumatic power system.

This benchtop hot melt glue machine features a 1.5-liter bulk hot melt tank. It is compatible with most hot melt adhesive formulations, including RT2315 hot melt candle glue carried by Wicks Unlimited with viscosity ranging from 500 to 20,000 cps. The easy-to-operate foot-actuated hot glue dispensing system allows for hands-free dispensing. At the same time, the built-in shot timer enables operators to repeat the same amount of hot melt adhesive accurately every time. An easy-to-use integrated temperature control switch on the bulk hot melt tank allows for quick temperature adjustment anywhere from 120°F to 420°F. (50°C to 250°C)

Features:

- Light weight, small volume, easy to move.
- Open cap easily, fill materials conveniently and safely.
- Pneumatic power system.
- Simple construction, easy to maintain.
- Pressure and flow are adjustable.
- Glue melts fast.
- Glue flow volume can be exactly controlled by an electrical timer.
- Not suitable for automatic machine systems.
